by David Estes

Price: \$4.99

AudioNote

by Luminant Software

Price: \$4.99

AudioNote

Notability

by Ginger Labs

Price: \$1.99

Voice Record Pro by Dayana Networks -- Price: Free

A good free voice recorder. This app offers 3 preset quality settings and offers the ability to sync your recordings with DropBox, Skydrive, Google Drive or send files through email.

Highlight by Cohdoo -- Price: \$3.99

Highlight works like a normal audio recording, but what sets it apart from other apps is the ability to tap the screen during a recording to mark (highlight) important information, without interrupting the recording. Make as many highlights as you want. Play back your recordings and with a tap of your highlight you can jump immediately to information you need. Highlight also syncs with DropBox for easy sharing and transfer.

Recordium by Pichak -- Price: Free (limited time)

Recordium is one of the most feature rich audio recorders for the iPad. Annotate audio recordings with notes, highlights and pictures without interrupting your current recording session. Playback offers the same annotation features and gives you the ability to add, delete or change any notes or markings. Playback also offers audio editing features like cut, paste and trim. Recordium allows recording in multiple formats (.wav, .aiff, .mp4, etc.) and also provides the ability to sync with DropBox, Google Drive, Evernote, and more.

HT Professional Recorder by Applied Voices -- Price: \$9.99

Record and edit meetings, lectures, and conferences right on the iPad. 3 record modes: personal; meeting; auditorium. Can speed up or slow down playback. Set bookmarks. Skip back or ahead 5 seconds. Export to e-mail or Dropbox; wi-fi file transfer to computer using web browser or ftp.
