SCHOOL OF PUBLIC HEALTH

MPH in Epidemiology Academic Year 2013-2014 Program Profile

The epidemiology concentration provides a comprehensive curriculum that will cultivate the student's ability to effectively practice in the contemporary epidemiology environment. Core and required courses establish a strong foundation to the fundamental competencies of public health and epidemiology, while electives afford students the flexibility to focus on desired areas of specialization. This allows students new to public health as well as practicing health professionals to customize their coursework to accommodate their interests and careers. The essentials of epidemiology, including research methods and design, statistical analysis and epidemiological investigation are emphasized. Students in the epidemiology concentration will acquire the skills to plan, design and implement research; evaluate existing research methodology; use computerized statistical programs to analyze data; interpret and disseminate the results of epidemiological investigations.

Epidemiology Concentration Competencies

Competency Description		
Describe a public health problem in terms or magnitude, person, time, and place		
Identify key sources of data for epidemiologic purposes		
Use data collection methods appropriate for epidemiologic research		
Design appropriate epidemiologic studies		
Apply analytic methods to answer epidemiologic questions		
Design and use survey tools		
Identify the principles and limitations of public health screening programs		
Critically evaluate epidemiologic evidence		
Communicate epidemiologic information to lay and professional audiences
