Research Video Update

We just concluded a research video featuring the work of ***Dr. Subhash Aryal*** entitled ***Biostatistics: using data to tell a story***. Some of the world's top public health problems are solved thanks to scientists behind the scenes who "solve the puzzle" through data.

SPH is proud to feature this video and it's currently playing on the 6th and 7th floor television monitors. It is also posted on the SPH website for easy viewing by students, community, and potential funders.

Be sure to come to the August 2nd faculty meeting where we will debut the video.

Jumpstart Your Career by Becoming an Early Career Reviewer

NIH is always looking for reviewers. Being a reviewer provides valuable insight to the review process that will help improve your own grant applications. One of our own SPH faculty members has already taken the opportunity to apply and was accepted.
